Best Practices

Electronic Records

- 001 Field
 - No letter prefix = OCLC records
 - Make sure you use the correct loader if you need to maintain prefixes (Sierra)
- ISBN/ISSN
 - print/other format ISNs in subfield z
- Encoding Level
 - Should be “U” or “L” for batch loads of e-resources

856 Display

- Put 856 in bibliographic record rather than item if possible
- If item URL is required, make sure to set the encoding level so you are not the primary record
- Add item records if you want call number, holdings or status information to display

Multi-Volume Sets

- While Model One is preferred, use whichever meets local needs
- Model 1
 - Volume number is essential if parts are split
- Model 2
 - Volume number should *not* be used
 - Ensure your record doesn't overlay the record for the entire set
